

Apply Scientific Method to *Customer Discovery*

Observe
“customer”
phenomena

Step 1

Apply Scientific Method to *Customer Discovery*

Step 2

Apply Scientific Method to *Customer Discovery*

Step 3

Get *out* of
the building!

Step 3: *Test the Problem*

(test your CS & VP guesses)

Value Propositions

Customer Segments

Step 3: *Test the Problem*

(test your CS & VP guesses)

Value Propositions

Customer Segments

Identify customer
problems and *needs*...

Step 3: *Test the Problem*

(test your CS & VP guesses)

Value Propositions

Customer Segments

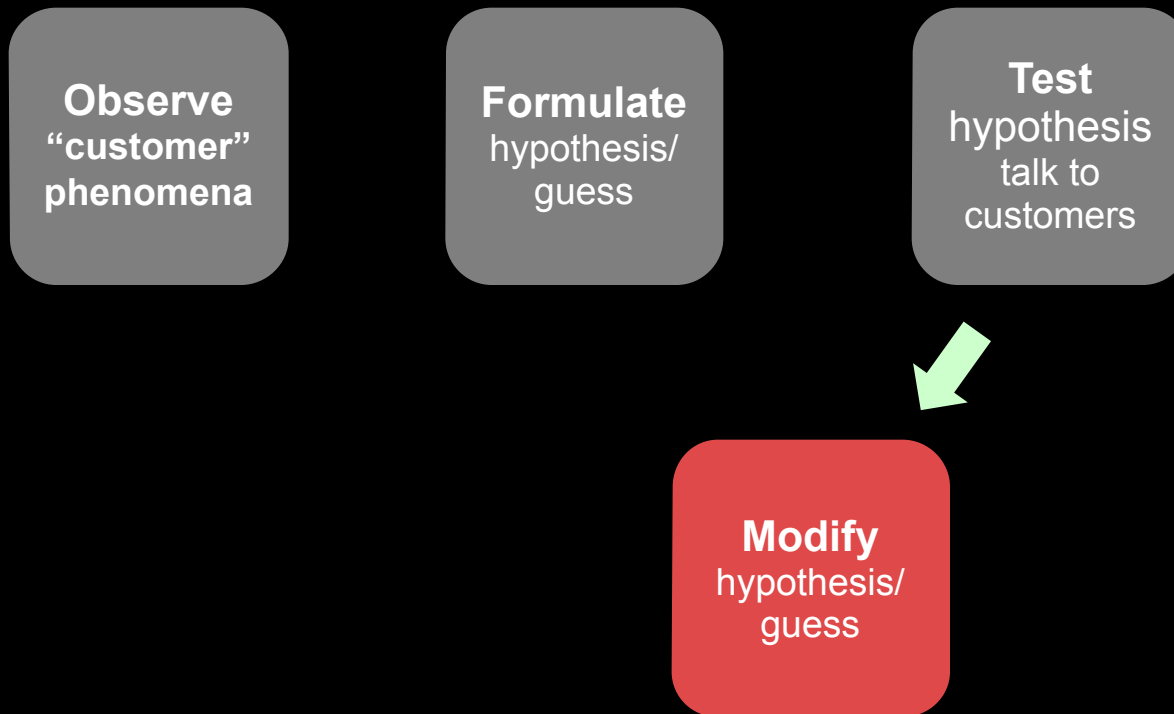

Identify customer
problems and needs...

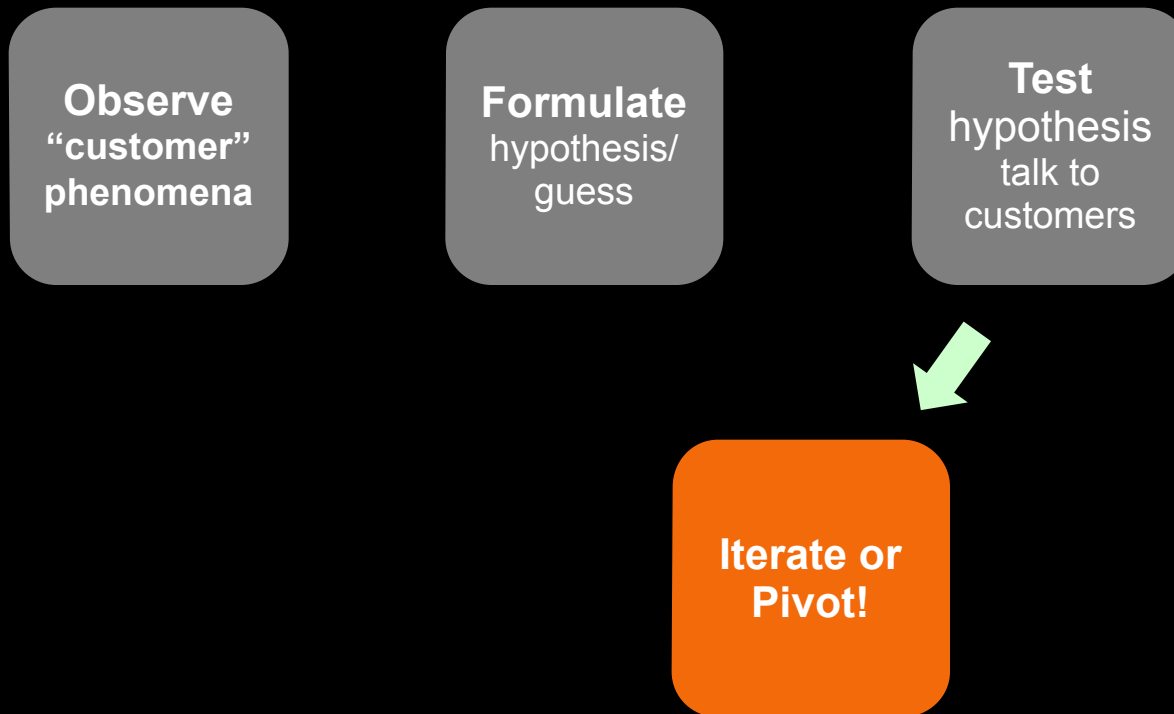

focus on customer pains, desired gains, and jobs.

Apply Scientific Method to *Customer Discovery*

Step 4

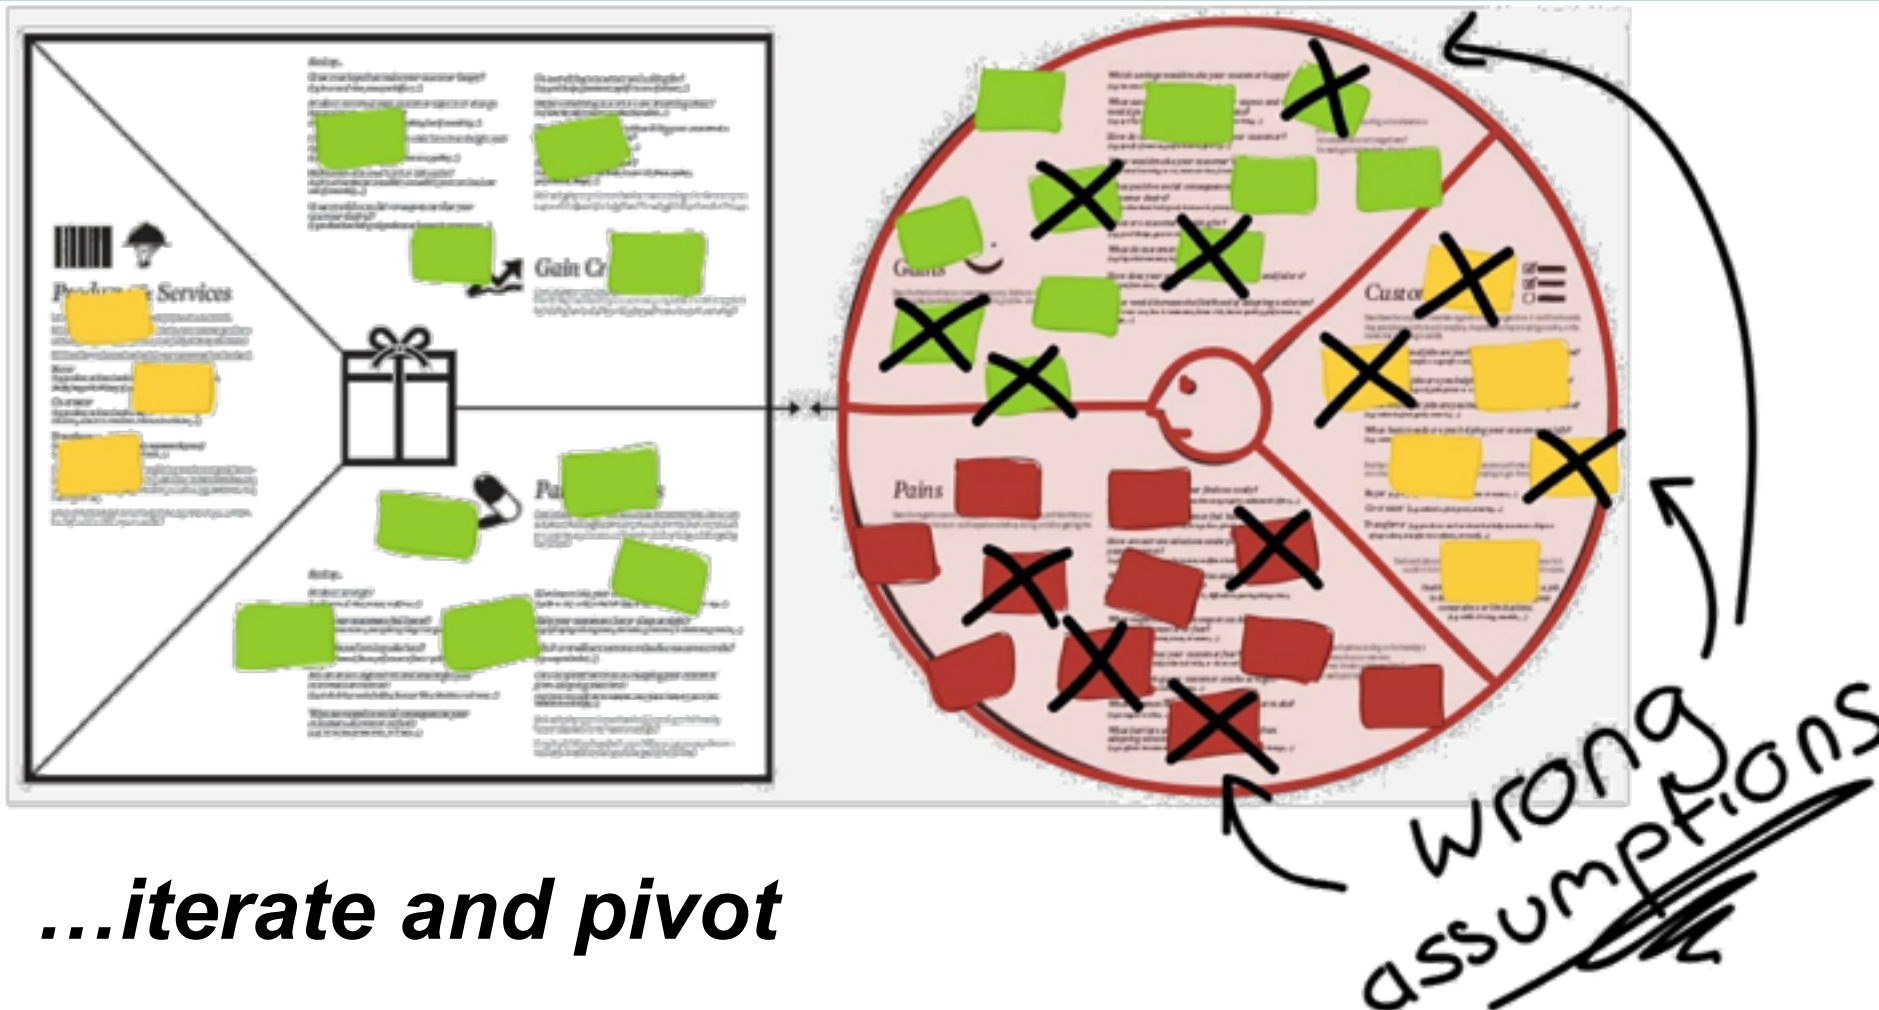

Apply Scientific Method to *Customer Discovery*

Step 4

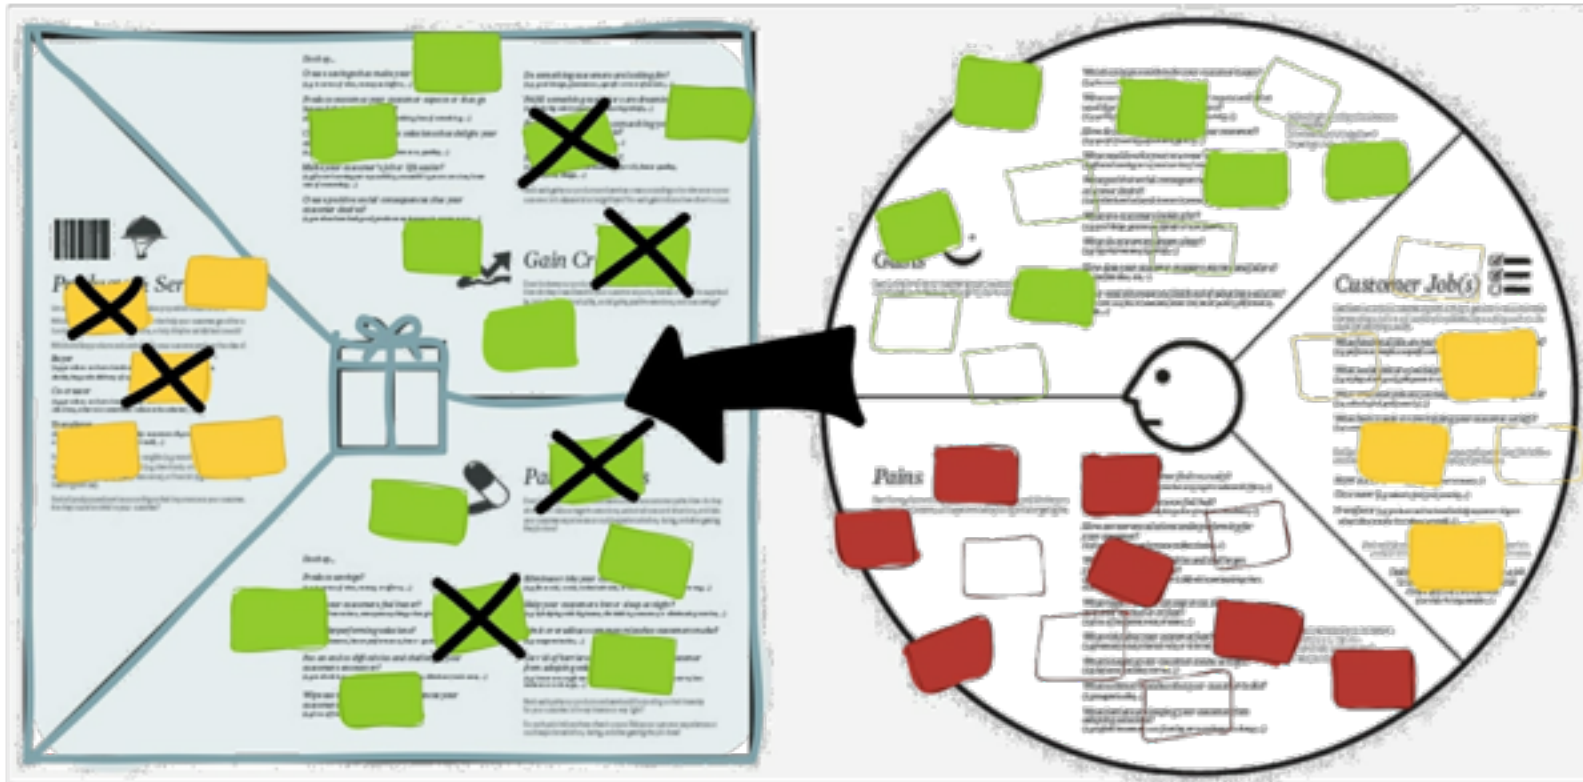

Step 4: *Iterate and Pivot*

(adjust your CS guesses about the Problem)

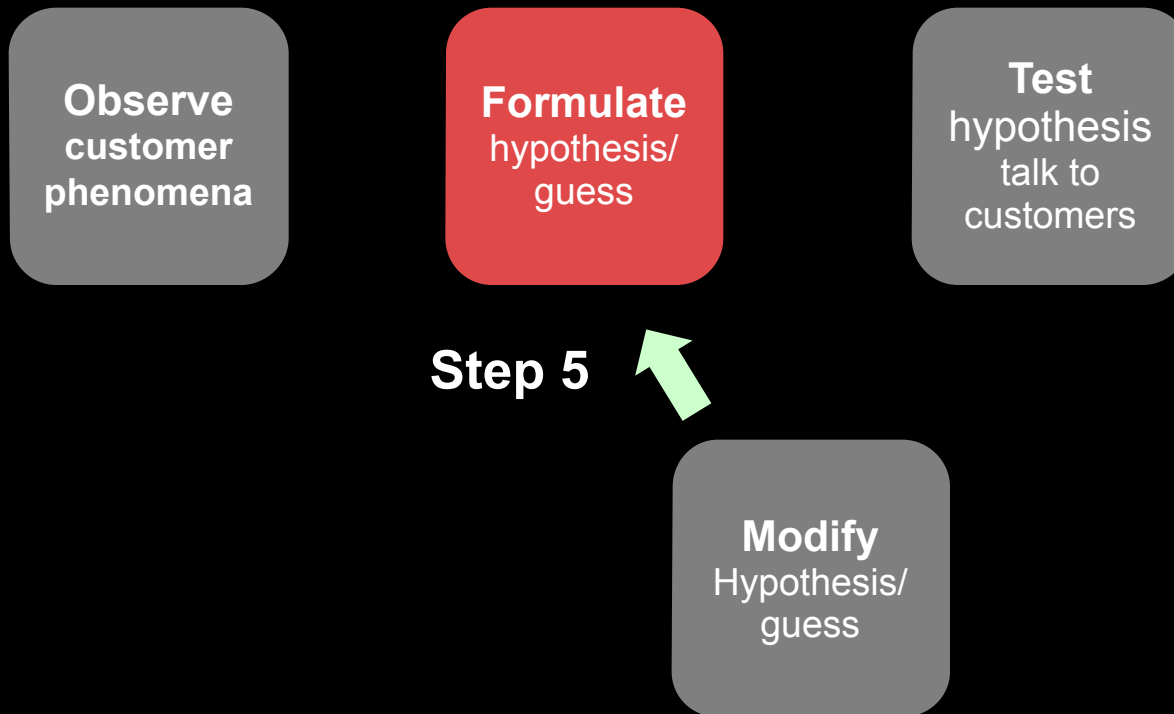

Step 4: *Iterate and Pivot*

(redesign Value Proposition about the Problem)

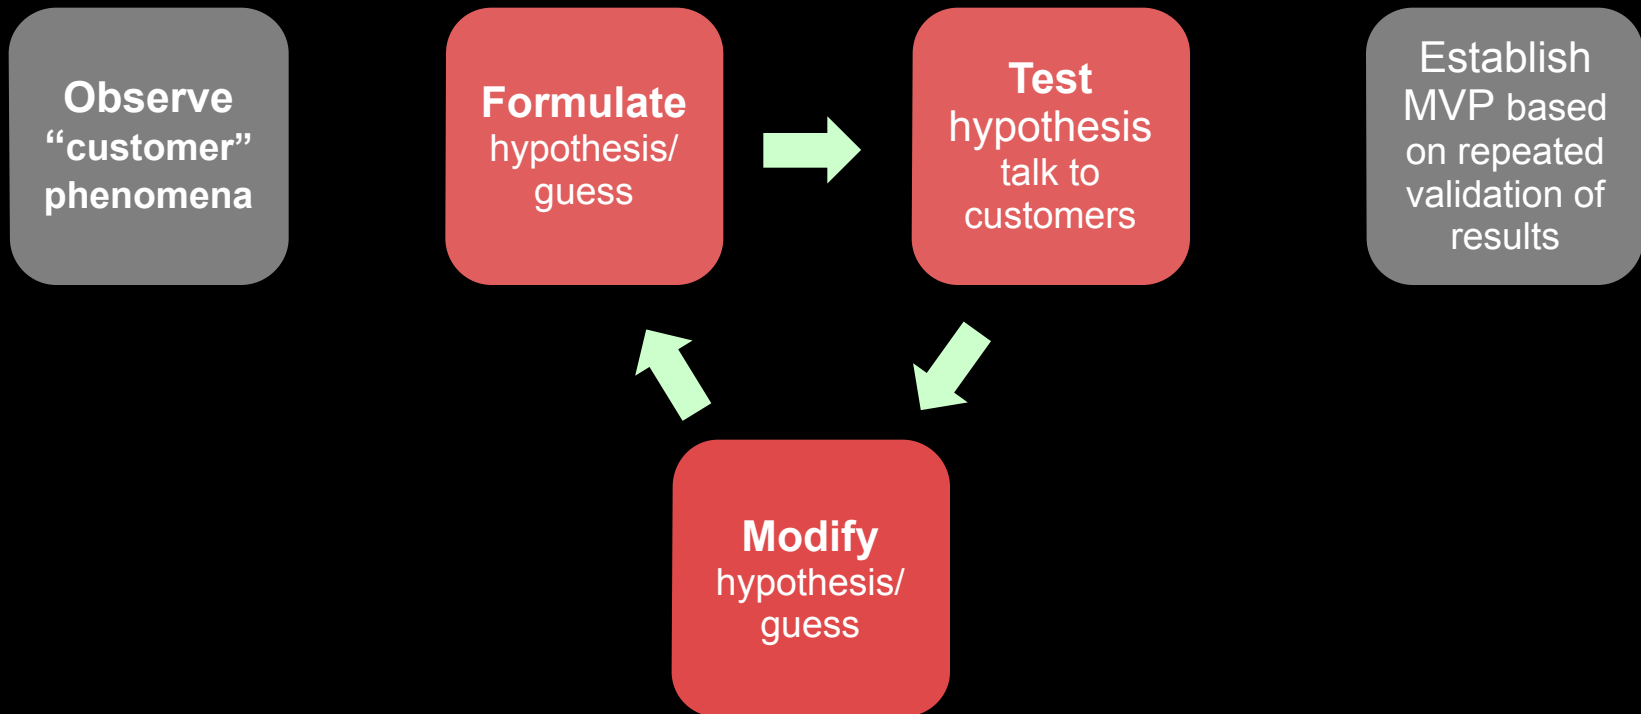

...iterate and pivot

Apply Scientific Method to *Customer Discovery*

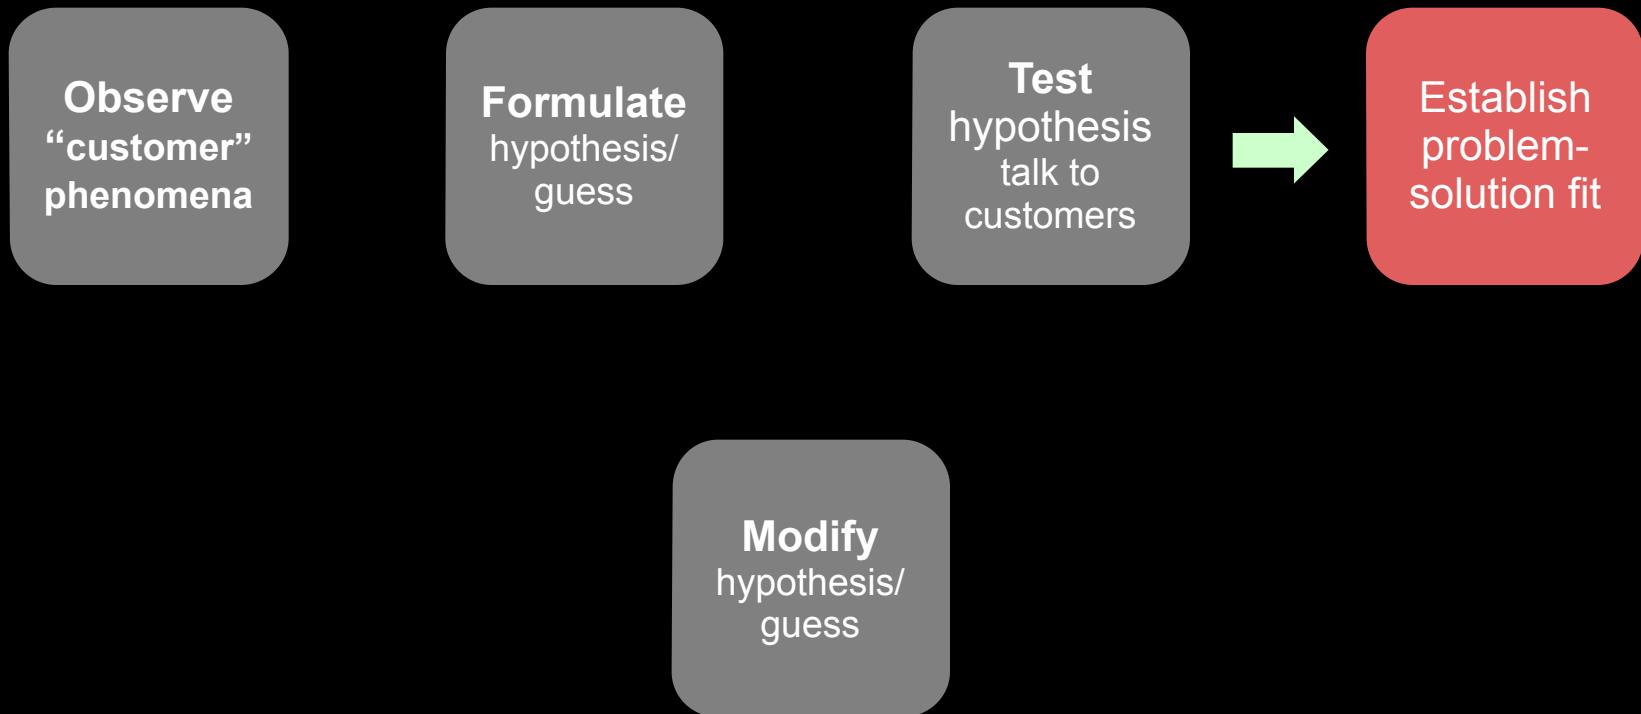

Apply Scientific Method to *Customer Discovery*

Repeat
as needed

Apply Scientific Method to *Customer Discovery*

Your goal is to validate a

Problem-Solution Fit

Now you can start
testing a product...

Minimum Viable Product

(MVP) approach

Test the *Solution*

Value Propositions

Customer Segments

MVP

Test minimum viable product features

Test the *Solution*

Value Propositions

Customer Segments

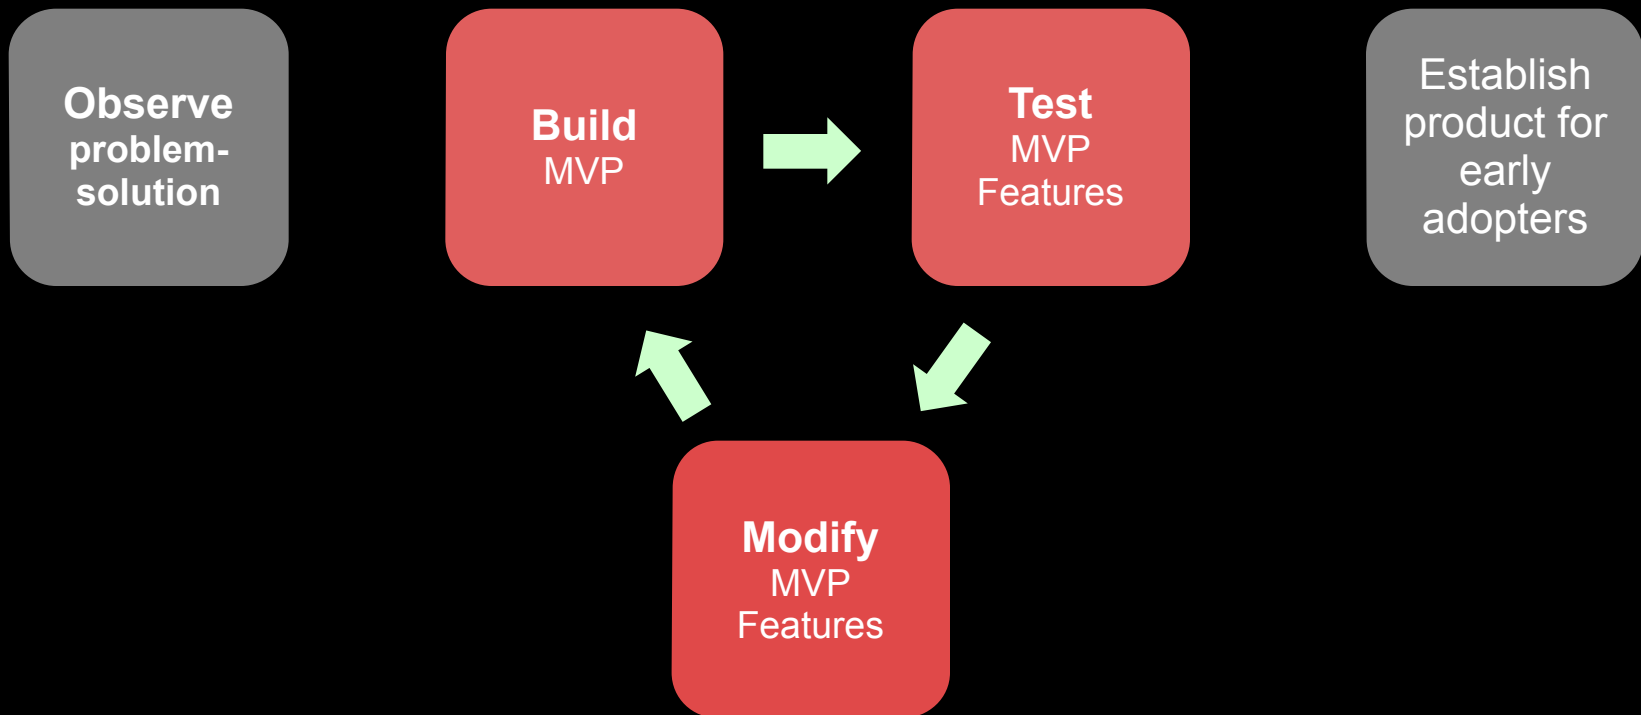

MVP

Test minimum viable product features

Do they satisfy *problems or needs?*

Scientific Method *for MVP*

Repeat
as needed
